Any additional directions or requests, questions or concerns

Mirror Specifications

Overall size of mirror

Orientation? Please specify the orientation you'd like your mirror hung.

If a beveled mirror is requested, please specify this in your specification.

Side marking instructions for installation

Mounting hardware —anti-theft security hardware or cleats?

Additional Mirror Tips

Keep your frame in mind if choosing a bevel. The frame "lip" will cover part of your mirror, so if a 1" bevel is desired to be seen, and the frame lip is a ¼", you'll need a 1 ¼" bevel.

If your mirror is to be hung in a wet or humid location (bathroom, pool area, etc.), please specify "ANSI" or protective backing. Some hotel brands require this backing for mirror locations. Be sure to check your client's guidelines.
